

Self-Led Work

Start to apply the learning from this week's session to your Make it Happen project idea...

Thinking about your own individual or collaborative ideas so far, list every expenditure item you can think of connected to your project. Use the planned expenditure template to have a go at breaking the £1000 down and see what's realistic.

Can you make the income and expenditure balance?

If not, what could you change/lose while still meeting the aims?

If that's not possible, do you need to think about other potential sources of income discussed in the session, e.g.: earned, match funding, charging to take part?

Remember you can still make changes to your project idea at any stage!

Have a go at completing the Working budget template
